

End Point Security Solution

Outbound™ implements cloud managed Endpoint Protection and Response solution

Outbound™ successfully implements end point security solution for a well-known UK recruitment online company.

Case Study

Background

A well-established UK recruitment company that founded the first online recruitment presence in the UK. This forward thinking enabled them to grow into becoming one of the UK's leading jobs and careers sites. They have thousands of potential applicants visiting their websites each year.

They wanted a trusted IT provider to assist them with vetting a few cost-effective end point security platform solutions to make sure their devices would be protected all the time, from anywhere and on all devices.

At a Glance

- Industry: UK recruitment company
- Number of node: 250 – 499
